## Professional Experience

**Senior Consultant UX/UI Designer**, July 2021 to Present — OPTIMITY ADVISORS, Los Angeles, CA

- Lead UX discussions to collaborate with product managers to create new features and present design work to the product team and senior leadership for review and feedback
- Effectively communicate with developers from concept through the implementation phase to realize design vision
- Lead design efforts to create new designs, functional product prototypes and organize design assets for efficient developer handoff
- Utilize knowledge of React to contribute to implementing new components and polishing visuals of the final web application

**UX Interaction Designer**, August 2018 to May 2020 — CERCACOR LABS, Irvine, CA

- Primarily responsible for creating wireframes, documenting user journeys, and adding annotations for developer handoff.
- Created dynamic, interactive prototypes of app features and worked with a user experience researcher to test, evaluate results and make necessary updates to the user experience.
- Worked with a team of 5 engineers to implement animations, micro-interactions and new features to the iOS code base.

**UX Designer & Front End iOS Engineer**, August 2018 to February 2019 — SPORTTRADE, Remote

- Primarily responsible for redesigning their iOS app using Sketch with a focus on improved usability and simplicity. Implemented the updated design and micro-interactions to the iOS code base in Swift.
- Utilized Sketch to create a new company logo, web app concept, and app store screenshots

- Designed and coded a custom theme for Sporttrade's company landing page using HTML, CSS & JavaScript hosted on Wordpress.

**QA Engineer**, June 2016 to May 2018 — GRASS VALLEY, Hillsboro, OR

- Automated functional testing of GV STRATUS, a collection of media production tools, using Selenium WebDriver and C# managed in Visual Studio projects
- Developed and maintained JScript libraries using TestComplete based on a test plan outlined in Test Rail for the GV STRATUS desktop and web client applications sanity and regression testing
- Facilitated the configuration management of systems by rebuilding cloud infrastructure using vSphere and performing GV STRATUS upgrades and downgrades

Previous Positions Held: Software Engineer, Software Tester
